

Coding Club

Coding Improves Academic Performance

Math: Coding helps kids visualize abstract concepts, lets them apply math to real-world situations, and makes math fun and creative!

Writing: Kids who code understand the value of concision and planning which results in better writing skill.

Creativity: Kids learn through experimentation and strengthen their brains when they code, allowing them to embrace their creativity.

Confidence: Parents enthusiastically report that they've noticed their kids' confidence building as they learn to problem-solve through coding!

Focus and Organization: As they write more complicated code, kids naturally develop better focus and organization.

Resilience: With coding comes debugging — and there's no better way to build perseverance and resilience than working through challenges!

Communication: Coding teaches logical communication, strengthening both verbal and writing skills. Think about it: learning code means learning a new language!
